Genmin Ltd (GEN.ASX)

Funding outlook appearing more favourable

Event:

Funding sensitivity analysis; Price target change.

Investment Highlights:

- Offtake partners in financing mix. Since our last report, GEN has been focussed on advancing its Baniaka project to FID, including advancing negotiations with its four China offtake MoU partners, two of which are included in financing discussions. Given the size and clout of the parties Baowu Resources, Jianlong Group, China Minmetals Corporation, and Hunan Iron & Steel debt will likely comprise a significant portion of funding. We currently assume US\$270M funding required (capex, working capital, corporate) via 67:33 debt: equity mix.
- Performance rights conditions incentive to deliver financing soon. GEN CEO will be granted 2M performance rights vesting in four equal tranches. The first three are for executing: 1) binding offtake for at least 15M; 2) mining convention; and 3) financing agreements all by 30 September 2024. We believe this signals confidence of FID and news flow within next few months. Final tranche vests on commencing production by 30 September 2025.

Earnings and Valuation:

- Risked share valuation (0.3x NPV₁₀ nominal) increases to \$0.61 from \$0.49 on lower dilution. We had previously assumed GEN equity for capex funding to be raised at \$0.10 share price, but given recent rally, this now appears less likely. We now assume it will be undertaken at around the current share price. As a result, our EPS forecasts increase from assuming lower share dilution.
- Sensitivity analysis to equity funding. We have run various valuation scenarios (refer matrix below) assuming: 1) different prices at which equity is raised; and 2) the mix of debt: equity used. These show significant uplift should GEN minimise equity funding relative to our 33:67 equity: debt mix. Any equity may also be strategically invested by offtaker(s), potentially at premium to share price.

Recommendation:

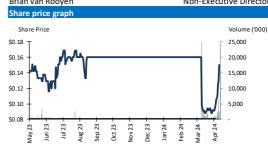

- We maintain our Buy and increase our 12-month price target to \$0.61 from \$0.49, in-line with our risked valuation.
- Key catalysts for the share price include: 1) Binding offtake agreements; 2)
 Finalisation of financing; 3) FID; 4) Commencement of construction; 5)
 Expansion, pellet feed VIU, and mine optimisation studies.
